Learning objectives

Designing with Protective Street Furniture

Following events in recent years, the threat of international terrorism has risen to unprecedented levels. This seminar introduces the threats and potential solutions, focusing on hostile vehicle mitigation and highlights the key considerations in counter-terrorism design and how protective measures can be incorporated into landscapes without compromising design quality.

Learning Objectives

- What are the threats to Security, Business and Property?
  - The government response
  - What areas are at risk?
- What is Hostile Vehicle Mitigation?
  - Understanding BSi PAS68 and BSi PAS69/Specification
  - The conventional approach
  - Design led Solutions
